

Evidence Resource and Services

[NICE Evidence](#)

Access [here](#) to authoritative evidence and clinical pathways from health, social care and public health organisations.

To find **Journals** and search **databases** [here](#)
You will need an Open Athens username and password.

[BMJ Best Practice](#)

A point of care tool ideal for junior doctors

If you need any help [watch our video guides](#)
or contact the [Library](#)

This point of care web resource provides clinical answers to clinical questions. A quick search on [UpToDate](#) provides you with the latest evidence and course of treatment for specific conditions.

In order to access the majority of our e-resources you will need your own [OpenAthens](#) username and password. If you do not already have one register [here](#)

Rather than going straight to Wikipedia or YouTube, check out [ClinicalKey](#) with easy access to hundreds of journals, core textbooks and anatomical diagrams you can read or download, along with, videos, clinical topics and procedures guidance.

Stay Informed with KnowledgeShare

This is our library service's evidence update service. We can set you up with fortnightly email bulletins personalised to your own clinical and professional interests. You get to specify exactly what you are interested in. The evidence is high level, i.e. the latest NICE guidelines, professional publications and evidence summaries. Have a look at our [website](#) to see if this is for you.

[Horizon Scanning Bulletins](#)

are collections of articles, reports, guidance and web resources produced every couple of months on specific subjects. Topics include *Maternal Health & Breastfeeding*, *End of Life Care* and *Dementia*. Click [here](#) to see the current range of topics and find out how to sign up for them

[ETOCS](#)

These are [Electronic Tables of Contents](#) for specific journal titles which are emailed to you whenever the latest edition of a journal becomes available. They are a very easy way to keep up with your most important professional publications. We can show you how to set these up yourself or, if we subscribe to the journals you are interested in, we can set them up for you
